Research  
Foundation

## Help Us, Save Lives.

We are prepared to save lives using our technology that has demonstrated complete elimination of mouse tumors in 15 days after one single treatment without any observed side effects. Within 24 months of reaching our fundraising goal, we can launch clinical trials in humans and start saving some of the 8.8 million people who are dying from cancer each year. Your tax-deductible donation can help us move from the laboratory to humans.
