

Ora Lee Smith Cancer Research Foundation Introduction and Background Information

Introduction

1. A **new way of treating cancer** has been discovered by one of the first African American women to earn a PhD in physics. Dr. Hadiyah-Nicole Green developed a **cancer-killing machine** that uses lasers and nanotechnology to kill cancer in mice in just 15 days after a **single 10-minute treatment**. Using no chemo. No radiation. No surgery. And **no observable side effects**.
2. In 2016, Dr. Green went viral for winning a million dollar grant for cancer research. This led to an interview with Roland Martin that has had more than 14 million views on Facebook. If everyone who saw that interview had each given just \$1, human trials could have started by now.
3. **Dr. Green founded the Ora Lee Smith Cancer Research Foundation** (Ora Lee Foundation) so this treatment can be made **affordable** for everyone.
4. The Ora Lee Foundation can **begin human clinical trials within 24 months** of reaching its first fundraising goal of \$10 million. Every dollar counts whether it is \$10 or \$1,000. We are asking 200,000 people to donate \$50 (or 100,000 people to donate \$100) or \$10/month to help launch human clinical trials.
5. Nearly nine million people die every year despite current treatment options. **Cancer patients who have no other options and who have lost all hope reach out to the Ora Lee Foundation. It is heartbreaking that we have the technology but not the funding to help.** By acting now, we can save lives and make history. The Ora Lee Foundation needs your support. **Become a monthly donor** to help move Dr. Green's treatment out of the laboratory and into human clinical trials.
6. Learn more, become a fundraiser and start your monthly donations at OraLee.org. **Make your tax-deductible donation today at OraLee.org or text "ORA" to 71777.**
7. **Cancer revolution.** We are on the brink of a revolution in how cancer is treated. We have the capacity to save lives. With our technology, we can. With your help, we will. This is not just a moment to give – it is a movement for change. Join us!

Background Information

- The Ora Lee Foundation is a 501(c)(3) nonprofit organization just like Susan G. Komen. All donations are tax-deductible. Please donate online at OraLee.org or text ORA to 71777. Mail checks payable to the Ora Lee Smith Cancer Research Foundation to P.O. Box 11184, Atlanta, GA 30310.
- To see our progress, visit OraLee.org/donate. *Please note that all donations made via AmazonSmile, Facebook or other donation platform (i.e. Boeing, AT&T, Benevity, United Way, etc.), check or monthly donations that began before August 2017, when we converted to a new donation platform called Mobile Cause, are inputted manually and updated periodically.*
- **Who is Ora Lee Smith?** Ora Lee Smith is Dr. Hadiyah-Nicole Green's aunt, who raised her from the age of four—so Ora Lee was more like a mother than an aunt. When Dr. Green was 18 years old, Ora Lee, the matriarch of their family, lost her battle to cancer. As her caregiver, Dr. Green witnessed Ora Lee's suffering. As a result, she made it her mission to change the way cancer is treated. After she developed a cancer treatment without side effects, Dr. Green wanted to keep it affordable and accessible; therefore, she started the Ora Lee Smith Cancer Research Foundation. She named the foundation after her inspiration in hopes that one day other families will not have to suffer the way hers did.
- **Clinical trials** are regulated by the FDA to ensure treatments are safe for humans. Our technology is ready to begin official FDA approved human clinical trials within 24 months of reaching the first fundraising goal of \$10 million.
- **Collaborations.** The Ora Lee Foundation has established collaborations with oncologists, surgeons, navigators of the FDA approval process, and the Atlanta Technology Development Center (a technology incubator funded by the state of Georgia). We are ready to begin human trials. Funding is currently our only barrier to starting human trials.
- **Partnerships and Sponsorships.** The Ora Lee Smith Cancer Research Foundation welcomes partnerships and sponsorships from organizations, businesses, corporations, and philanthropists. For more information, email info@WeAreOraLee.org.
- **Use of Funds.** The Ora Lee Foundation is an all-volunteer run non-profit organization and maintains good standing of 501(c)(3) status with the IRS and GuideStar, an organization designed to provide advanced transparency on nonprofits. All donations are tax-deductible and will be used towards the translation of our cancer treatment out of the laboratory and into humans. Specifically, donations will provide the funding for:
 - Converting the technology for human use (human-grade nanoparticle manufacturing, bottling and distribution; laser device development, manufacturing and distribution)
 - FDA application fees and approval
 - Phase I, Phase II and Phase III human clinical trials for solid, inoperable tumors, initially
 - With funding, we can pursue clinical trials for head and neck, breast, prostate, brain, colorectal, anal, cervical, skin, liver, bladder, kidney, or lung cancer including chemo-resistant, recurrent and metastatic cancers
